Amendment to the Specification

In the Specification:

Please amend the specification as follows:

On Page 20, the paragraph beginning at line 19 should be replaced with the following.

Step 908 is followed by step **910**, in which the palette **208** is sent to the application program **202** for display on a user interface associated with the application program **202**. The property browser program module **200** can send the palette **208** to an associated application program **202** through the shared code library **204**. The application program **202** can receive the palette **208** and display the palette **208** on an associated user interface. In addition to the palette **208**, the predefined interface **210** can also be sent to the associated application program **202** through the shared code library **204**. The application program **202** can then receive the predefined interface **210** and display the predefined interface **210** on the associated user interface in conjunction with the palette 208. The method ends at a step **912**.
